

ATKINS

St Lucia Coastal Habitat Mapping Project

Improving Our Understanding through
training and awareness raising

ENVISION 

www.atkinsglobal.com

**Looking to the future –
pressures and impacts for
coastal management**

➤ **A habitat map and database can be used to support:**

- **Store data.**
- **Present and communication information.**
- **Assist and justify decision making.**

- ? What do you think are the three main [sources of] pressures on the coastal system of St Lucia?
- ? What do you think are the main impacts from each of these pressures?
- ? What do think are the current weaknesses and threats from current procedures to address these pressures and impacts?

**How can these weaknesses and threats
be transformed into strengths and
opportunities?**
